Project Details:

Project Involved: Learning Management System

Client   **:** India
Environment : React, MySQL, Javascript, NodeJs

Synopsis   : This is a LMS platform where users can check all available security related courses and take the assessment based on their subscription. In the assessment, users can see the topology of the network and start/stop any instance/ dockers. Also, admins can manage users & courses from this system.

Project Involved: Gaming Platform

Client   **:** India
 Environment : React Js, MongoDB

Synopsis   : This is an employee engagement through Gaming platform. Where the admins can manage the Users and Games. This platform provides different types of online games with multi

levels, scores & leaderboard. Also, it provides demo access for the users to play before subscribing for the platform.

Project Involved: Lead Distribution Platform

Client   : Australia

Environment   : React Js, Typescript.

Synopsis   : This is a lead distribution platform that sells motivated seller leads to real estate investors nationwide. End users will be able to login, add territories, schedule set-up calls, and set up notifications via SMS, email, and webhooks.

Project Involved: Employee Internal Application

Client   : India

Environment   **:** React, Javascript, AWS, NodeJs

Synopsis   : This application was created for Mitrah employees where employees can fill their timesheets and they can do their internal exercise and submit for review. Then the reviewer can review that and if there is any correction needed, the reviewer will send that back to for re-work. Till the exercise completes this process is going on. All employees details including their Leave details are maintained in this application.
